

Community-Led Research Network

Session 4 – 10th April 2023

Introduction to the Session and Overview of Last Week

Welcome and introduction to the sessions: doing some research - what needs to be done by whom and when!? Agreeing upon the research question.

Refresher on consensus decision-making

Research question:

- How wildlife friendly are Otleley's gardens?
- What are the barriers to making them more wildlife friendly?

1. Share reflections/discussion
2. State whether you agree/ offer amendments/ stand-aside/ block

Agree the research question/topic

Identify individual team objectives

We are going to have 3 or 4 research teams - so what do you think those teams could be focusing on so that the overall aim is achieved? [not focusing on methodology/tools but on different geographic areas and/or different elements related to the overall topic]:

- huddles of 3 or 4 people
- write on post-it notes
- A/A/J collate the post-it notes into 3 or 4 or 5 themes.

self-select which team they would most like to be involved with?
Divide into groups determined by what individuals are interested in.

Work your way through the plan template

Identifying and allocating research methodologies; tasks

Project teams feeding back to the whole group; changing anything in their plans in light of that

How will sub-groups relate to each other - collective timeline

Make sure everyone in your team has everyone else's phone details
